Kandirpar,Cumilla,Bangladesh

OBJECTIVE

Seeking a challenging role in Computer Science and Engineering, specializing in Machine Learning. Aiming to contribute to impactful projects that combine theoretical knowledge with practical solutions to solve real-world problems.

EDUCATION

- **Bangladesh University of Engineering and Technology** 2022 – Present
Bachelor of Science in CSE Dhaka, Bangladesh
- **Notre Dame College** 2020
Higher Secondary School Certificate (HSC) Dhaka, Bangladesh
- **Cumilla Modern High School** 2018
Secondary School Certificate (SSC) Cumilla, Bangladesh

PROJECTS

- **A-Mazing** 2022
A maze-solving game built with C and the iGraphics library [GitHub](#)
 - Developed as part of an academic project, implementing graphical algorithms for maze generation and solving.
- **JavaFlix** 2022
A movie search platform based on object-oriented design principles [GitHub](#)
 - Features search functionality by name, genre, year, and runtime; developed using Java.
- **Fest-in-Peace** 2023
An event management system for hosting and tracking events [GitHub](#)
 - Developed using React, Node.js, and Oracle Database; enables tracking fest progress and managing multiple events.
- **Dealytics** 2023
A price comparison platform for buyers and inventory tracking for sellers [GitHub](#)
 - Built to provide product price analysis and shop restocking alerts; implemented in a full-stack environment.
- **Centralized Education System** 2024
A transparency-focused education management system [GitHub](#)
 - Developed for Java Fest competition using Spring Boot and React.
- **Potato Disease Detection** 2024
A machine learning project for detecting early and late blight in potatoes [GitHub](#)
 - Utilized TensorFlow, PyTorch, and OpenCV for image analysis and disease classification.

SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript
- **Database Systems:** MySQL, MongoDB, PostgreSQL
- **Machine Learning:** TensorFlow, PyTorch, Keras, OpenCV, Pandas, NumPy, Matplotlib, Scikit-learn
- **DevOps Tools:** Docker, Git
- **Frontend Development:** React, Material-UI, Bootstrap, Next-JS
- **Specialized Areas:** Machine Learning, Data Science, Problem Solving

ADDITIONAL INFORMATION

Languages: English (Good), Bangla (Native)

Interests: Badminton, Cycling, Watching Movies, Traveling
